

Gut-Menschen

Prosperity. Peace. Pleasure.

The new global regime for 2028 and beyond:

In 2028 everybody will be unemployed due to 1.) AI and 2.) robots – except for art and social jobs.

The global Gut-Menschen movement – German for „do-gooders” movement – is the answer.

We will live in paradise – no more pedo elites:

Just global 1.) prosperity, 2.) peace and 3.) pleasure.

I.) What to do when 1.) AI and 2.) robots do all the work in 2028?

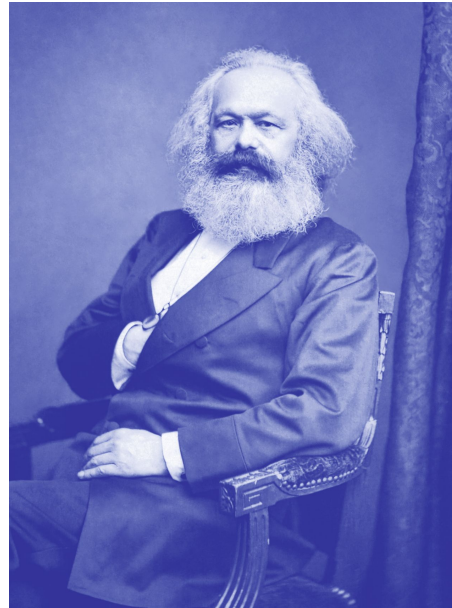

1.) Well, **capitalism comes to a natural end** then and the economy will be managed by an open source AI then.

2.) **We will tax the richest 1%** – and then live happy ever after.

3.) We will introduce **a global wealth tax of 100%** above an individual net worth of USD 250,000 / EUR 230,000 / CHF 215,000 to fund everything we need.

4.) We will have **an universal basic income (UBI)** financed by the wealth tax of 100%.

5.) **Everybody will then get what he / she needs** – 1.) Karl Marx' and 2.) Friedrich Engels' dream comes true.

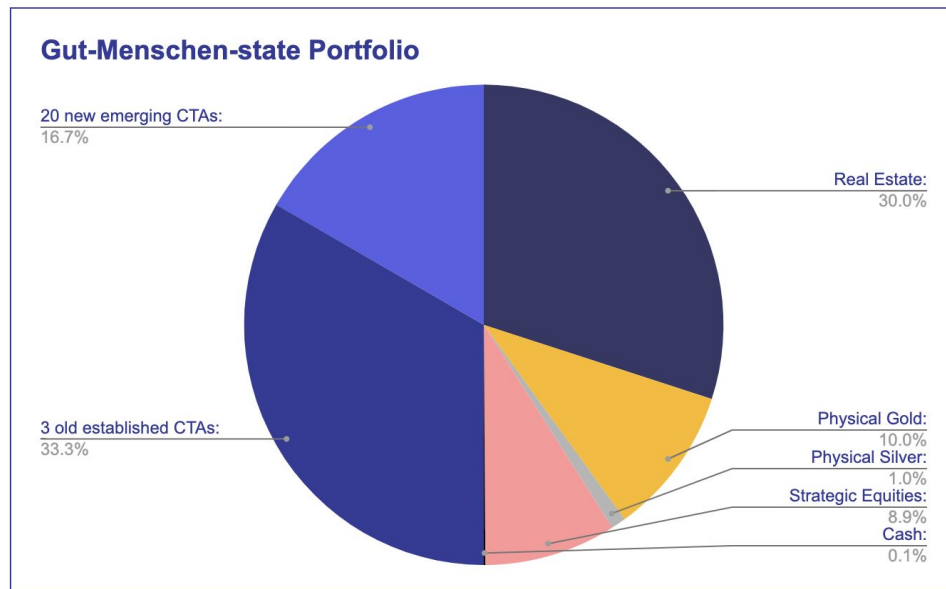

Karl Marx (1818-1883)

Friedrich Engels (1820-1895)

II.) How will the actual financing work? With CTA hedge funds!

All wealth above USD 250,000 / EUR 230,000 / CHF 215,000 goes to the Gut-Menschen-state – specifically a sovereign wealth foundation entity – to preserve the wealth forever:

I.) We invest 50% in classic investments:

- 1.) Real Estate (30%).
- 2.) Physical Gold (10%).
- 3.) Physical Silver (1%).
- 4.) Strategic Equities (8.9%).
- 5.) Cash (0.1%).

This part of the portfolio will return about 5% a year.

II.) And 50% in CTA hedge funds – hedging the portfolio and generating very good returns – even in crises:

- 1.) 3 old already established CTAs (33.33%).
- 2.) 20 new still emerging CTAs (16.7%).

This part of the portfolio will return about 11% a year.

In total the portfolio returns about 8% per year for the Gut-Menschen-state.

III.) How will this look like? We look at Germany as an example!

- 1.) Germans have about **13 trillion euros in personal wealth** – so this all goes to the Gut-Menschen-state – and we will then take an extra Lombard loan of 50% of the portfolio to hedge the Gut-Menschen-state portfolio for about 1% interest a year.
- 2.) We – the Gut-Menschen-state – then have **19.5 trillion euros to invest**.
- 3.) The classic investments (50%) will return about 5% a year – while the CTA hedge funds will return about 11% a year. So in total we will generate about **8% return per year**.
- 4.) So we will make about **1.5 trillion euros a year** to finance the entire German population.
- 5.) This is **enough to give everybody what he / she needs**.

V.) We then make everybody look beautiful

1.) Everybody gets 1.) a body mass index (BMI) of 20.1 and 2.) a blood pressure of below 120:80.

2.) Men get circumcised and a penis enlargement surgery – while women get their breasts adjusted according to their height and their turkey labia corrected.

3.) Additionally we 1.) fix hair loss, 2.) do lip enlargement, 3.) provide harmonious nose rings, 4.) tongue piercings and 5.) breast piercings.

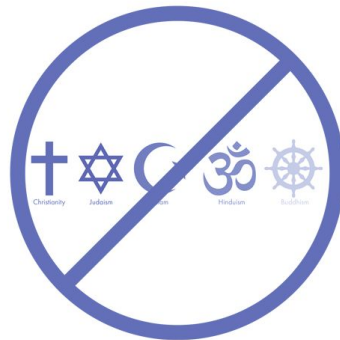

VI.) What else?

1.) Like mandatory school – **we make university mandatory** – everybody has to finish at least a masters degree – but you can choose which field – 1.) social science, 2.) natural science and / or even 3.) art. This makes everybody more interesting to talk to. Our culture will then be much more interesting.

2.) You also have to take **one intercontinental trip each year** to another continent to see the world and become more worldly – meaning more tolerant towards others.

3.) **You have to become an atheist** – to stop all the nonsense religious violence.

VII.) How will everything work if it is not capitalism any more?

1.) We will have a **global open source AI** – the „*dialektika.AI*” – that will manage everything: 1.) Total world production and 2.) total world consumption.

2.) Everything will be monitored and operated in real time by *dialektika.AI* so that we can focus on what matters: Love – **loving each other makes us happy.**

3.) **We will love our family – especially our Liebes-Menschen** – and focus essentially only on what we like to do – for example mostly doing art in the future – 1.) making movies, 2.) making video games and 3.) writing literature – we will be free to do what really is interesting for us.

VIII.) What do we need from a venture capital (VC) firm?

1.) Some funds to advertise for a **global upper wealth limit** at USD 250,000 / EUR 230,000 / CHF 215,000.

2.) For example, in Germany we need about 600 euros for a public advertising spot – for one year that makes 7,200 euros – multiplied by 100 spots we need 720,000 euros to have a **regime change in Germany**.

3.) A **global regime change** costs about 10-times that – so 10 million euros should be enough for a global regime change as our campaign will go viral globally.

IX.) Conclusion: Enjoy loving in the future!

The Gut-Menschen movement gives you 1.) prosperity, 2.) peace and 3.) pleasure – enjoy!

Gut-Menschen

Prosperity. Peace. Pleasure.
